Resonant[®] is an innovative **underwriting and case management** solution that allows carriers to leverage the latest technology in decisioning, taps into a leading rules engine, and automates workflow to reduce the time to underwrite an application. Whether you need a case approved and issued instantly, or require full underwriting, Resonant facilitates the entire underwriting process -- including case intake, evidence gathering and evaluation, correspondence, reinsurance integration, and policy decisioning. Resonant's powerful rules and dynamic engine can automate this workflow from start to finish, all while allowing carriers to easily manage underwriting and case management workloads.

With dozens of integrations with evidence vendors, our underwriting solution digitizes, as well as accelerates insurance processing and underwriting, every step of the way.

FEATURES

Extensive third-party integrations available

Underwriting workbench with customized user interfaces
